

Presentation

避免：

1. 太多颜色
2. 太多字
3. 设计太简约 -> 设计反映更多内容
4. 太多动画
5. 太多 images (1-2/slide)
6. 字体过多 -> Slide 统一字体/ **Unreadable**

推荐字体：

- Time New Roman
 - Arial, Calibri, Tahoma, Verdana
7. 字号适中(>20pt)
 - Heading 40pt -50pt
 - Bullet points up to about 32pt
 8. Images vs Font 对比度高，字体不融入背景图片

注意：

1. Coherence – Logically organized the content.
2. Creativity – For paper => generate new ideas and surprise./

For pre => try to make your PPT presented in a creativity way.

如何让你PPT的呈现形式更创新。

3. Grammar & Spelling
4. Eye Contact – 如果紧张看额头+看向不同方向 & Pronunciation – 实在不行换一个单词
5. Volume – 声音足够大，不要声音忽大忽小
6. **不要一直读！** 可以用 note 提醒自己要说什么，但是不要直接读全文。最理想：读关键句 + 解释。
适当的停顿。
7. Posture & Gesture – 手部动作不要过多
8. **10 – 15min! 不超时! 不过短!**
9. **需要涵盖以下部分：**

1. **Title Slide:** Include the title, your name, institution, and the date.
2. **Introduction:** Briefly explain the research topic, its significance, and how it relates to existing literature.
3. **Methods:** Explain the methods used for the research in a concise manner, highlighting what sets your work apart.
4. **Results:** Present your key findings, using visuals like tables and graphs.
5. **Discussion:** Interpret the results and their implications, drawing connections to the introduction and existing knowledge.
6. **Conclusion:** Summarize the main points and highlight the study's contributions.
7. **Questions and Answers:** Be prepared to answer audience questions.

即便可能没有Q&A, 但是一定要加这页slide!

如何准备PPT?

1. Title slide (1)

- 1) Paper Title, Authors, Journal
- 2) Your Name & Student ID
- 3) Course Code & Date

2. Introduction (2–4)

需要包含:

- 1) **Broad context:** Set the stage by providing a broad overview of the research topic and why it is important. Include a compelling image to engage the audience.
- 2) **Literature background:** Briefly summarize previous research, building up to the specific gap your study addresses.
- 3) **The research gap:** explicitly state what is not yet known. Use a visual to illustrate the problem or missing piece of information.
- 4) **Hypothesis and objectives:** Clearly state your hypothesis and the specific aims of your project.

3. Methods (1–3)

- 1) **Study design and materials:** Use a diagram, flowchart, or icons to represent your experimental design and key materials. This is far more effective than a block of text.
- 2) **Data Collection Procedures:** If your methodology is complex, break it into a step-by-step visual process. Label each part clearly.
- 3) **Data analysis:** Briefly mention the key analytical techniques used to interpret your data.

4. Results (3–5)

Using chart and graph, instead of raw data.

不要只是展示图片，你需要去解释！

Choose the most important finding (3–4)

- 1) **Present key findings:**

- a. Dedicate one or more slides to each of your key finding.
- b. Visual: Display a graph, chart, table of your data. Avoid simply dumping data. Verbally explain what the graph shows.

- 2) Repeat the same structure for all critical results.

5. Discussion (2–4)

- 1) **Interpretation:** Explain what your results mean in relation to your hypothesis.
- 2) **Significance:** Discuss how your findings fit into the broader field of study. You can visually compare your results to previous studies.
- 3) **Limitations:** Acknowledge the weaknesses or limitations of your study. This demonstrates honesty and rigor.
- 4) **Implications and Future directions:** Explain the impact of your work and suggest the next steps for research.

6. Conclusion (1)

- 1) **Summary:** Briefly reiterate your main findings in a concise, bulleted list.
- 2) **Take-home message:** End with a strong, memorable statement that summarizes your core message.

7. Acknowledgement and Q&A (1)

- 1) Acknowledgements: Thank all contributors, collaborators, funding sources, and your institution.
- 2) Q & A: A clear, final slide to open the floor for questions.

Acknowledgement是致谢环节，对于这次pre，不需要。

最后一页直接放Q&A就好。

像这样。

-
- **Know your audience:** Adjust your language and content to suit the audience's level of expertise.
 - **Keep it simple:** Avoid overwhelming the audience with too much information.
 - **Be prepared to answer questions:** Anticipate potential questions and practice your answers.
 - **Focus on the results and discussion:** These are the most important section of the presentation.

result and discussion 是最重要的！需要解释清楚。

Around 20 slide, 10 –15 min, 每页 around 30s。
